

Clearing Cache

Within Chrome:

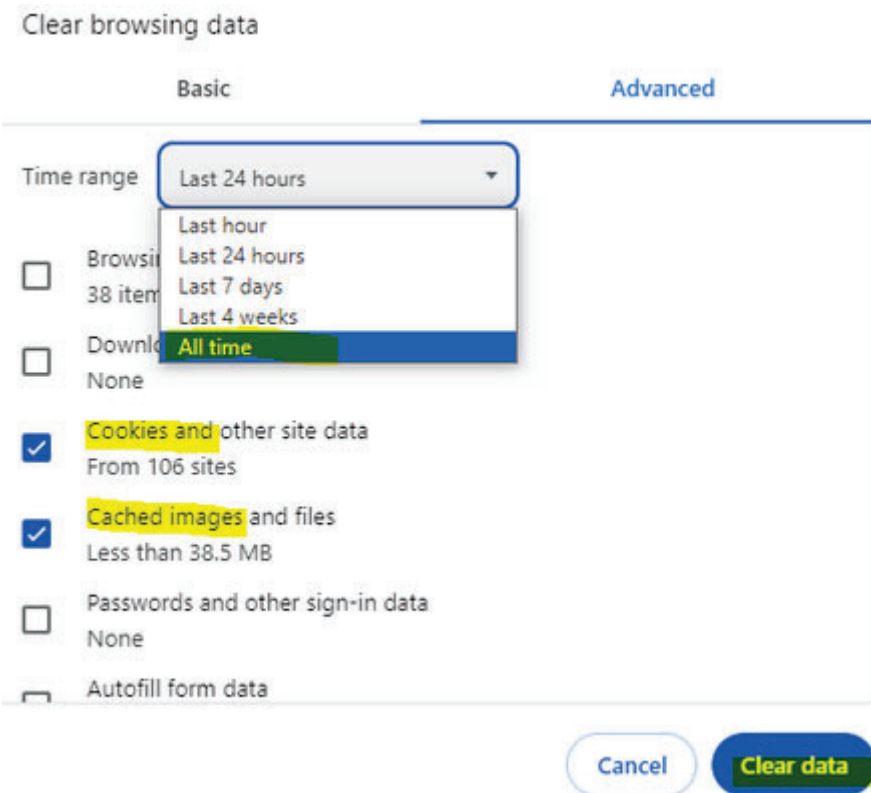

1) Click on the three dots to the top right and choose the Settings option.

2) From here, choose the Privacy and security option, then Clear browsing data.

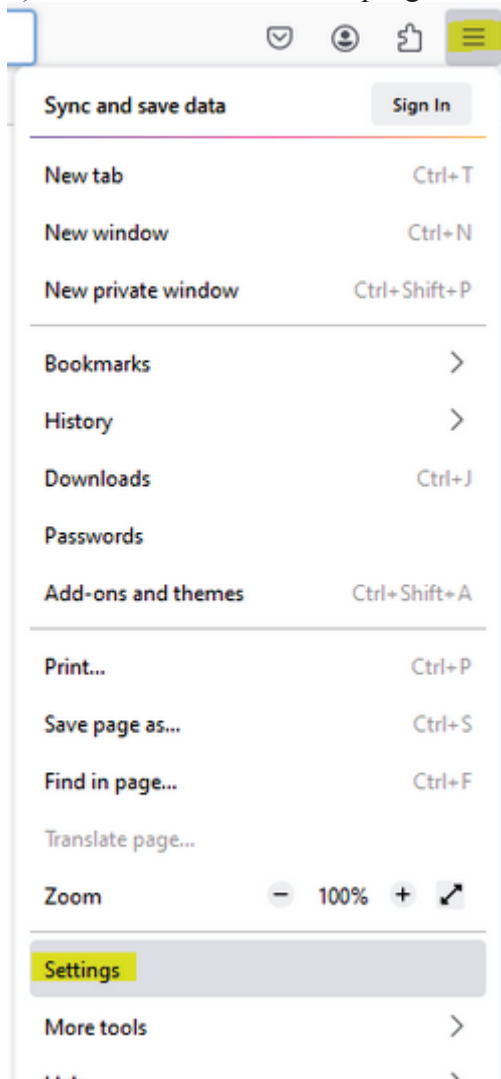

3) From here, you can choose the time frame in which to clear, typically it is best thought to do of All time. Keep the Cookie and Cached options checked off and then Clear the data.

Within **Firefox**:

1) Click the 3 lines at the top right and select Settings.

- 2) Next, choose the Privacy & Security option then scroll to the Cookies and Site Data section.
- 3) You would then click on Clear Data.

The screenshot shows the Firefox settings interface. On the left is a sidebar with navigation options: General (gear icon), Home (house icon), Search (magnifying glass icon), Privacy & Security (lock icon, highlighted in yellow), Sync (refresh icon), and More from Mozilla (Firefox logo icon). The main content area is titled 'Privacy & Security' and features a blue header with a link to 'Learn more'. Below this are two radio button options: 'Strict' (selected) with the description 'Stronger protection, but may cause some sites or content to break.', and 'Custom' with the description 'Choose which trackers and scripts to block.'. A section titled 'Website Privacy Preferences' contains two unchecked checkboxes: 'Tell websites not to sell or share my data' and 'Send websites a "Do Not Track" request', both with 'Learn more' links. The 'Cookies and Site Data' section is highlighted in yellow and shows 'Your stored cookies, site data, and cache are currently using 1.2 GB of disk space.' with a 'Learn more' link. At the bottom of this section is an unchecked checkbox: 'Delete cookies and site data when Firefox is closed'. On the right side of the page, there are three buttons: 'Clear Data...' (highlighted in yellow), 'Manage Data...', and 'Manage Exceptions'.
